Funda  
Lounge Chair

# FUNDA

## Circular design

The commitment to maximum sustainability and comfort shapes Funda, a new range of seats conceived by the outstanding designer Stefan Diez.

The chair, the armchair and the stool of this new collection are presented as a construction made up of two differentiated pieces, two pieces capable of extending the life cycle of the product indefinitely. The development of Funda has been based on combining a metal structure designed to last over time, and an upholstered seat that can be replaced after years of use or severe

wear and tear. This intelligent system also facilitates the independent recycling of each of the materials in the collection.

Funda represents the balance between precision and the human-centered approach of Stefan Diez. His constant search for both industrial innovation and visual appeal has achieved in this collection a curved and friendly shape, combined with an upholstery known for its wrinkles.

In this way, Funda manages to evoke the maximum expression of comfort and makes available the different pieces.

On the left page, a picture of black naked structures in with a Funda chair. On this page, detail of the chair's leather wrinkles

THE FAMILY

The commitment to maximum sustainability and comfort shapes Funda, a new range of seats conceived by the outstanding designer Stefan Diez.

Funda family composed of a chair, a lounge chair and stools with bar and counter height in black and white structures

# Funda

## Lounge chair

Funda lounge chair is versatile, elegant, and comfortable. The piece boasts the delicate and synthetic charm the German designer brings to all his creations. Funda means “cover” in Spanish and is portrayed as a structure made up of two distinguished upholstered sections that, due to its shape, simulate the gesture of two hands embracing the user. “Funda: sustainability and comfort designed to stand the test of time.”
